

- Average Tax Refunds for 2009 already up 10% -

Washington, DC – Today, Rep. John Hall (D-Dover) encouraged Hudson Valley residents to take advantage of numerous tax cuts in the Recovery Act. Tax refunds are already up 10% from last year – thanks to a broad array of tax cuts in the Economic Recovery Act.

“Many people don’t realize that tax cuts are the biggest individual piece of the Economic Recovery Act,” said Congressman Hall. “Congress gave 95% of working Americans one of the largest tax cuts in history through the Recovery Act. And as you file your 2009 income taxes, you may qualify for a series of other tax cuts – for example, you could save money for attending college, making energy-saving home improvements, purchasing a home for the first time, or buying a new car. I encourage Hudson Valley residents to take advantage of these and other tax cuts as they file their 2009 taxes.”

Taxpayers in the 19th District and across the country can claim a variety of benefits on their 2009 tax returns, including:

- The Making Work Pay tax credit – Ninety-five percent of working families are already receiving the Recovery Act’s Making Work Pay tax credit of \$400 for an individual or \$800 for married couples filing jointly in their 2009 paychecks – and will continue to see these benefits in 2010. In the 19th District, 231,000 families are benefiting from the Making Work Pay tax credit.
- Tax credits for college expenses – Families and students are eligible for up to \$2,500 in tax savings under the American Opportunity Credit as well as enhanced benefits under 529 college savings plans, which help families and students pay for college expenses.
- The First Time Homebuyers tax credit – First time homebuyers can get a credit of up to \$8,000 for homes purchased by April 30, 2010 under the First Time Homebuyer tax credit. In New York, more than 58,000 households have already taken advantage of the First Time Homebuyers tax credit.
- Tax credits for energy efficient renovations – Taxpayers are eligible for up to \$1,500 in tax credits for making energy-efficient improvements to their homes, such as adding insulation and installing energy efficient windows.
- The vehicle sales tax deduction – Taxpayers can deduct the New York State and local sales taxes they paid for new vehicles purchased from Feb. 17, 2009 through Dec. 31, 2009 under the vehicle sales tax deduction.
- Expanded family tax credits – Moderate income families with children may be eligible for an increase in the Earned Income Tax Credit and the additional Child Tax Credit.
- Tax-free unemployment benefits – Under the Recovery Act, individuals who received

unemployment insurance in 2009 do not have to pay taxes on the first \$2,400 of such earnings.
